INDEX

Avian/Cole Tubes, Silicone

- Sterile
- Radiopaque
- Accepts 15mm Adapter

Also referred to as the 'Cole' Endotracheal Tube, with lower profile on the distal end to aid proper placement and larger proximal end helps form a tighter seal. Stepped down 'Cole' style wall. Complete with standard 15mm connection.

"We find that these tubes meet our needs perfectly, providing both flexibility and rigidity"

Matthew Rendle RVN

Code	Description
ATS010	1.0mm x 12cm with Guide Wire
ATS015	1.5mm x 12cm with Guide Wire
ATS2013	2.0mm ID x 5.0mm x 13cm
ATS2513	2.5mm ID x 6.3mm x 13cm
ATS3015	3.0mm ID x 8.0mm x 15cm
ATS3515	3.5mm ID x 8.6mm x 15cm
ATS4015	4.0mm ID x 9.6mm x 15cm
ATS5018	5.0mm ID x 12.6mm x 18cm
ATS6018	6.0mm ID x 15.1mm x 18cm

Endotracheal Tubes Uncuffed, PVC

Available individually or in boxes of 10

- Soft Medical Grade PVC
- Transparent for easy observation
- Clearly Marked Guidelines & Depth Markings
- Radiopaque positional guideline
- Murphy Eye

These ET Tubes are available up to 10mm upon request. Maybe subject to minimum quantity of 10.

An optimal volume cuff with ideal pressure distribution and effective sealing. The thin ultra-smooth cuff wall reduces abrasive creases and folds, conforms to the tracheal contours and provides an effective seal.

Ensures tube patency for patient safety, whilst softening at body temperature to conform to the patient's respiratory tract.
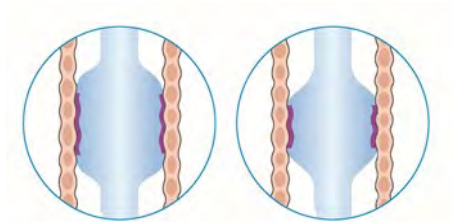

Endotracheal Tubes Cuffed, Portex

These resemble standard endotracheal tubes, but also contain a spiral of metal in the tube wall. This is particularly useful where kinking of the tube may occur perhaps during dental work or eye surgery.

Sizes 3mm — 9.0mm are supplied with an intubation stylet

Available individually or in box quantities

Cuff Pressure Management

AG Cuffill

Code	Description
AGCCP	AG Cuffill Device

Allows measuring and reading the exact cuff pressure without losing pressure during connection . Easy to use as the operation of the device is similar to the existing practice of filling the cuff with a syringe. Provides indication of cuff pressure & volume. Can be used approximately 100 times.

Cuff Pressure Manometer

Code	Description
CICPM	Cuff Pressure Manometer
CICPM-SA2	Replacement 1 metre extension tube

Manual cuff pressure gauge for inflating and controlling tracheal tubes with high volume low pressure cuffs. For continued cuff pressure monitoring, the device can be connected to the tracheal tube by means of a 1m extension tube.

Surgivet Post Anaesthetic Nasal Tube

Code	Description
ENAT14	Nasal Tube 14.0mm ID x 19mm OD x 40cm

- A proximal silicone funnel fitting to avoid tube migration
- Autoclavable
- Non-sterile
- Radiopaque

Intersurgical Intranasal Mucosal Device

Medication can be quickly and painlessly delivered with the DART Intranasal mucosal atomisation device. Atomised medication delivery results in therapeutic onset delivery similar to intravenous delivery. There is no specialised training required for a system wide adoption. The delivery method is painless for the patient, helping them remain calm in a high stress situation.

Code	Description
DART140	DART™ intranasal atomisation device with 3ml syringe and vial adapter.
DART300	DART300™ intranasal atomisation device without syringe

Laryngo-tracheal Mucosal Atomisation Device

Medication can be quickly and effectively delivered for difficult airways with the DART-Reach. The device has a flexible stylet, allowing for a customised approach and can be used in a variety of procedures, for example awake intubations, transoesophageal echocardiograms, or difficult airways.

Code	Description
REACH700	DART-Reach™ Atomisation Device, 218mm
REACH720	DART-Reach™ Atomisation Device, 117mm

Eldridge Anaesthetic Facemasks

The Eldridge Anaesthesia Mask addresses a common problem. A standard round mask wants to roll away from patient on a flat table. Towels are often used to brace the mask into position. The Eldridge mask is flat on one side to prevent this "rolling" and safely keep the mask in position. Patent pending.
– Used to induce gas anaesthesia and sometimes maintain anaesthesia in patients
– Provides oxygen therapy in patients with severe respiratory distress

Code	Size
ELDFM-SML	Small, OD 3.5", Depth, 3", Opening 1"

Oxygen Recovery Masks

- Facilitate post-surgery, post-trauma and post smoke inhalation patient recovery
- Mask body is manufactured from durable polycarbonate
- Diaphragm is made from tear-resistant thermoplastic material and is inert with polycarbonate for longer life
- Mask features dual vents, not valves, to ensure unrestricted inhalation and exhalation to prevent unforeseen reduction or increase in oxygen flow
- Includes a rubber-mounted 22mm oxygen adapter and 7ft of oxygen tubing
- Designed to be used with oxygen tanks
- Optional hook and strap sets available to secure the mask
- Used by fire departments around the world
- Easily cleaned in 1:20 solution of bleach and water.
- 2 year warranty against manufacturer defects

BAL300	3.0mm	11mm	300cm

Endobronchial Blocker

- Can be inserted down a tracheal tube after tracheal incubation to block the right or left main bronchus for a controlled one lung ventilation. The lung tissue distal to the obstruction will collapse, allowing the surgeon's view and access to the relevant structures within the thoracic cavity

- Achieves lung separation and one lung ventilation as an alternative to double lumen tubes
- Manufactured from transparent medical grade PVC allowing clinicians to visualise any blockage quickly
- Atraumatic tip with double offset eye to provide relief if the distal hole becomes occluded for easy insertion
- Smooth surface for easy insertion
- Supplied sterile in easy access sachets

Code	Description
EBO7FR	Endobronchial Blocker 07FR
EBO9FR	Endobronchial Blocker 09FR

Intersurgical Air-Guard

For use in respiratory systems and oxygen concentrators

Air-Guard™ is a hydrophobic pleated membrane filter for the protection of oxygen concentrators and other respiratory equipment.

Providing an excellent level (>99.999%) of protection against bacterial and viral challenges, the Air-Guard's product performance has ben tested, validated and verified at independent microbiological laboratories.

The Air-Guard pleated mechanical filter is validated for 24 hours use but this can be extended when used in non-humidified gas flow.

Please note: this product is contraindicated for use at the patient connection end of the breathing system.

Single Code	Description	Box Qty	Code
CIR2143	15mm Flextube anaesthetic breathing system with luer elbow and resealable water trap, 1.6m	10	**CIR2143/10**

Intersurgical Compact™ 'Y' Circuits

Features and Benefits include:

Optimum compression - the unique tube design results in a system which can be compressed to almost one fifth of its extended length.

Lower resistance to flow - the Compact tube is designed with a shallow profile resulting in more laminar gas flow and lower resistance to flow.

Lightweight system - the Compact system is lighter than other extendable systems ensuring that the 'pull' on the patient's airway device is kept to a minimum.

Adjustable length - the Compact system is packed and supplied in the shortest length. This can be simply extended to the length required for clinical use (with the advantage of reduced compressible volume), and compressed for easy disposal. The unique tube has been designed so that it will expand to between four to five times it's packed length, providing the most adjustable system available.

Easy positioning - the nature of the Compact system tube allows for it to be set in any position required. This results in multiple positioning possibilities, ideal for head and neck surgery where the system can be positioned away from the patient, and does not require any additional patient connections.

Single Code	Description	Box Qty	Box Code
CIR2158	Circle Circuit 22mm x 3.0m Adjustable	40	**CIR2158/40**
CIR2163	Circle Circuit 15mm x 3.0m Adjustable	40	**CIR2163/40**
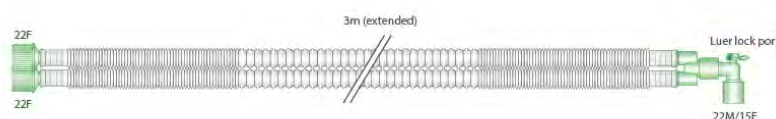

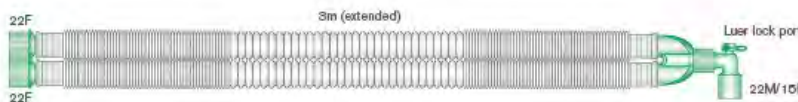

Make your own Y Circuit to the length you want.....

Should you need a longer Y Circuit we can provide all the parts you need to assemble your own. These include the correct connectors to attach to your Circle System and the Y Connector for the patient end. The 15mm parts list includes a paediatric Y piece to reduce Dead Space. In both sizes the length must be in multiples of 400mm.

To make a 15mm Circuit you will need...

Darvall Smooth Wall Circle Circuits

Darvall Smooth Wall Tubing (SWT) Circuits use low resistance, low volume, small diameter tubes. This new concept in circuit design offers HUGE efficiency advantages for the patient as well as for your practice.

Features & Benefits:

- Easy to use
- Fits all standard anesthetic gas machines
- Smooth Wall Tubing (SWT) Circuits reduce circuit resistance
- Reduced resistance means they can be used for smaller patients
- Smaller diameter tubing reduces circuit volume by up to 75%
- Reduced circuit volume improves response and efficiency
- SWT Circuits are kink-resistant
- Easy to clean and dries thoroughly and quickly
- Two sizes: Small (12 mm) for animals up to 20kg, and Large (15 mm) for animals over 20kg

Code	Description
CIRD12	12mm x 1.6m, 0.5 & 1 litre bag. For animals 3-20kg
CIRD15	15mm x 1.6m, 3 litre bag. For animals over 20kg

Corrugated Tubing

Available per 400mm length or in box of 50 metres.

01491 527027

Zero Dead Space Circuit for Rodents and Exotics

Features & Benefits

- Delivers inlet gas directly into patient mask (zero dead space) for more rapid and predictable anaesthesia

- Reliable control of anaesthetic delivered to rodents

- Diaphragm openings available to suit a wide range of animals, from rats and mice to small animals and exotics

- More efficient single animal induction of rodents and other small animals
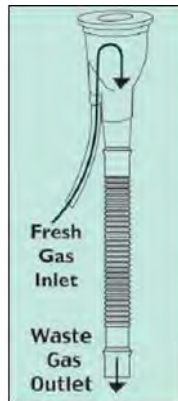

Darvall ZDS (Zero Dead Space) Masks provide predictable delivery of anesthesia for rodents, birds and exotics 2kg and under. The stream-lined flow eliminates dead space, avoiding the need for tight fitting face masks.

Code	Description
ZDSM	Zero Dead Mask with 12mm and 20mm Diaphragms
ZDSDIA12	Replacement Diaphragm 12mm hole (to stretch to 15mm)
ZDSDIA20	Replacement Diaphragm 20mm hole (to stretch to 23mm)

Exotic/Small Mammal Anaesthesia Mask and Non-Rebreathing Circuit

These especially small masks were specifically designed for use on small exotics such as pocket pets and birds. The small circuit hooks up the same way as a non-rebreathing circuit does to an anaesthesia machine. The masks fit tight around the nose and mouth. Soft conforming cone can be trimmed to custom fit animal's nose. The oxygen/gas tube position can be adjusted inside mask. Also circuit can be taped to the table to help keep it positioned on the animal's nose or muzzle.
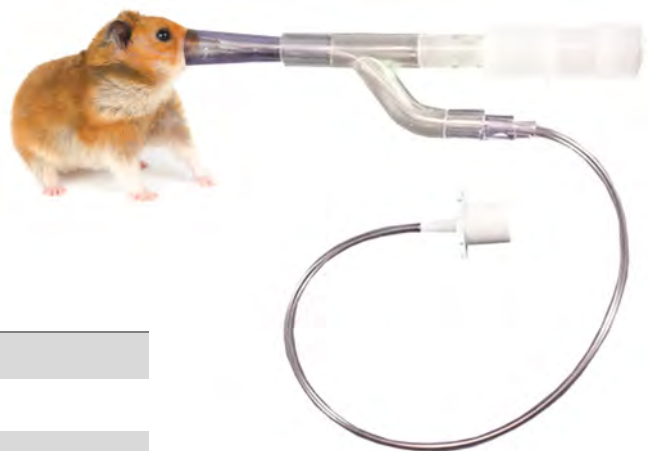

Code	Description
CIR-J0297AN	Exotic/ Small Mammal Circuit 9.0mm
CIR-J0297BN	Exotic/Small Mammal Circuit 12.5mm
CIR-J0297CN	Exotic/ Small Mammal Circuit 14.0mm

In Circuit Pressure Manometer

- Works on common non-rebreathing circuits
- Simple to use – detach rebreathing bag and insert Manometer (directions included)

Code	Description
PMD040	In Circuit Pressure Manometer for 22mm Circuits. 0-60cm H20
PMD040TP	In Circuit Pressure Manometer for Ayres T Piece. 0-60cm H20
PMD020	In Circuit Pressure Manometer for 22mm Circuits. 0-25cm H20
PMD020TP	In Circuit Pressure Manometer for Ayres T Piece. 0-25cm H20

The In Circuit Patient Pressure Manometer is the safest way to accurately monitor the circuit pressure using non-rebreathers and circuits that do not utilize the manometer on the anaesthesia machine. It can also be used to add pressure monitoring capabilities to older anaesthesia machines that lack manometers.

The In Circuit Patient Pressure Manometers has a standard 22mm connector that can be used on all circuit types.

The Kit for the Ayres T Piece includes a connector to enable fitting to the smaller circuit.

PEEP Valves

Intersurgical valves are 100% tested and individually identified with a code on the valve itself, so that performance data is available for future reference. The transparent body design, coupled with the coloured internal components, allow for easy blockage assessment and monitoring of patient's respiratory rate. Within the lightweight, robust L-shaped design we also feature an internal disc valve to satisfy the patient if the peak flow requirement exceeds the set flow.

Code	Description
PEEP2202	2.5cm H_2O Colour Coded Black
PEEP2205	5.0cm H_2O Colour Coded Blue
PEEP2207	7.5cm H_2O Colour Coded Yellow

PEEP2212	12.5cm H_2O Colour Coded Dark Pink
PEEP2215	15.0cm H_2O Colour Coded Red
PEEP2220	20.0cm H_2O Colour Coded Brown

01491 527027

EMD Safety Valve

Most veterinary anaesthetic machines do not have a safety pressure relief valve. The pop-off valve can perform this function but it is easily defeated by being manually closed during mechanical ventilation and during system pressure testing. If the operator forgets to re-open the valve, tragedy results.

The EMD Safety Valve is a simple solution to this problem. It cannot be manually defeated. It is passive in that it does not need to be turned on like pressure alarms do. It can be placed anywhere in the rebreathing breathing circuit.

The valve opens once the airway pressure exceeds approximately 26 cm H_2O, bleeding off gas pressure, thereby preventing barotrauma. Pressure will remain open until the pop-off valve is opened or the patient is disconnected from the circuit.

All anaesthetic machines should be equipped with a Safety Valve. Human error is unavoidable. This simple passive device will prevent a simple oversight from resulting in the death of a cherished pet and devastating effect a tragic medical error can have on the staff and the practice.

Code	Description
EMDSV	EMD Safety Valve
EMDSA	EMD Scavenging Adapter

MRI Compatible Disposable Laryngoscopes

- Disposable system eliminates the risk of cross infection between patients

- Supplied with 2 x limited reuse 3.7V batteries, each providing 100 minutes of illumination

- Super bright LED far exceeds the light output requirements of ISO 7376

- IS0 7376:2020 Compatible, to be used with PROACT MRHPC blades only

- Tested to ASTM standards as suitable (MR Conditional) for use in MRI environments as a blade and handle set

- No touch removal and insertion of batteries reduces the risk of cross-contamination

- Non-magnetic, full metal handle construction with grooves offering strength and secure grip

- Affordable, cost effective, simple and disposable solution

- Supplied in easy to open, clearly identified MR sachets and dispenser box

- Latex Free

Jorvet, Silicone

- Most tubes are supplied with an obturator. These aid in insertion and are removed after placement.
- All tubes have a 15mm connector. This is the same fitting as an endotracheal tube and allows hook-up to an anaesthesia hose.
- All tubes have pliable wings or flanges allowing tying the tube in place with cotton (umbilical) tape or gauze.
- Tubes are non-cuffed or cuffed (needed when assisting ventilation).
- Tubes are single lumen cannula.
- All tubes are 100 percent silicone that softens at body temperature.
- All cuffed tubes are high volume low pressure and profile.

NOTE: Tracheostomy tubes are sized by their I.D. Tubes should be ~50% of the tracheal lumen width. The trachea changes diameter during the respiratory cycle. The tracheal body is wider than the larynx.

Hydrotrach HME Filter

The InterTherm T+ is a heat and moisture exchanger (HME) designed for use with spontaneously breathing patients in order to reduce loss of heat and moisture during respiration, ideal for patients and clinicians caring for patients living with a tracheostomy.

Small and lightweight, it features both a clipped suction port and swivel oxygen stem combined with a unique white corrugated paper HME design to provide the perfect combination between humidification output and low resistance to flow. The product is also available with supplemental oxygen tube.

Available each or Box of 20

Needles for Blocks Under Ultrasound: 30° BEVEL (USB)

The USB stimulation needle features a familiar 30 degree 'back-cut' bevel tip for extra confidence in those used to this type of bevel, and improved perception of the needle's passage through tissues.

Code	Description	Diameter	Length
USB050-22/10	Ultrasound Needle 50mm. Box of 10	22G	50mm
USB070-22/10	Ultrasound Needle 70mm. Box of 10	22G	70mm
USB090-21/10	Ultrasound Needle 90mm. Box of 10	21G	90mm
USB120-21/10	Ultrasound Needle 120mm. Box of 10	21G	120mm

Needles for Blocks Under Ultrasound: 20° BEVEL (USC)

The USC stimulation needle features a flattened 20 degree bevel tip, maximising the visibility under ultrasound – even when 'out of plane'. The needle is treated with a 'roughening' effect, maximising echographic properties and providing the user with a clear return.

Code	Description	Diameter	Length
USC050-22/10	Ultrasound Needle 50mm. Box of 10	22G	50mm
USC070-22/10	Ultrasound Needle 70mm. Box of 10	22G	70mm
USC090-21/10	Ultrasound Needle 90mm. Box of 10	21G	90mm
USC120-21/10	Ultrasound Needle 120mm. Box of 10	21G	120mm

Needles for Blocks Under Ultrasound with Stimulation (Hybrid)

Code	Description	Diameter	Length
EH035-22/10	Hybrid Needle 35mm. Box of 10.	22G	35mm

08750302A	Replacement Cable (Red & Black)

BSmart™ Injection Pressure Monitor

BSmart™ Injection Pressure Monitor is an easy-to-use inline injection pressure monitoring device providing clinicians with objective pressure information regardless of who performs the actual block.

While perineural injections are typically associated with low opening injection pressure (< 15psi) [1], high opening pressure can indicate needle-nerve-contact [1] or intrafascicular needle placement.[4]

Monitoring the opening injection pressure with BSmartTM may prevent injections into poorly compliant tissue by aborting an injection and repositioning the needle when the monitor indicates that opening injection pressure is abnormally high (> 15psi).

Code	Description
BSMART	BSmart Injection Pressure Monitor

Mistral Air Warming Unit

The Forced Air Warming unit is lightweight, easy to clean and made of shock absorbent material.

Improve patient outcome through safe, comfortable and smart patient warming.

Optimised heat transfer due to Multi Sensor Technology & Powerful Fan
Optimal elimination of air contaminants by the HEPA filter
Ergonomic and flexible in use as a result of the slim & lightweight design
Equipped with a versatile mounting bracket, the slim warming unit offers caregivers a diversity to securely position the warming unit across all care areas.

WAB12060	120cm x 60cm
WAB9060	90cm x 60cm
WAB7570	75cm x 70cm
WABSET	Set of 3 as above

The Jorvet blankets are made of a silky polyester fabric with an inlay of nylon water proof material to keep the air-flow circulating upward towards just the patient. These blankets are machine washable (hang to dry) therefore much more economical than other air blankets on the market, which are disposable. There is a 5" diameter round opening with a nylon cord to secure the blanket to any of the major brands of warm air convection units.

Hoverheat Forced Air Warming

HoverHeat is the only forced air warming system that provides true under-body warming. With its proprietary internal components, HoverHeat provides a cushion of heated air to warm under and over body - something not previously possible with forced-air warming!
The most Complete patient air warming system ever
True under and over body warming with one warm air blower
Use any warm air blower
Use for surgical, dental, endoscopy, and imaging procedures
Use for Pre-op, Intra-op, and Post-op warming

The set includes:

1 Small HoverHeat.
1 Medium HoverHeat.
1 Large HoverHeat.
1 HoverHeat Connector.

Reflect-a-Therm Table Cover

- Reflect-a-Therm Table cover offers excellent insulation for the animal.
- The reflective layer and the insulating bubbles stops up to 80% of the animals heat escaping through the cold stainless steel.
- Excellent way of keeping animals warm during examination, where Hyperthermia is a real risk.
- The PVC is sealed using HF welding to ensure the cover is claw proof and leak proof.
- Can be easily wiped clean and is padded for added comfort.

PART NO	SIZE
RATTC11560	115cm x 60cm
RATTC12050	120cm x 50cm

Silver Heat Products

Looking for an **inexpensive, easy-to-use method of improving patient warming**, in any situation, **Silver Heat products** are made from a special, aluminium-coated reflective nonwoven material that bounces up to 80% of your patient's radiant heat loss back towards the animal, providing what we like to call *"patient-powered" warming*.

WTB-MED	Warm Thermal Blanket Medium 610mm x 860mm
WTB-SML	Warm Thermal Blanket Small 510mm x 710mm
WTB-SET	Set of Small, Medium & Large Blankets

- Use either ConRad Thermal Blanket immediately upon induction of anaesthesia or sedation.
- Prevents the rapid Phase I drop in body temperature.
- The time taken to prep for surgery and apply monitors can drop the animal's body temperature several degrees even before surgery or imaging starts, unless preventative measures are taken.
- The General Use ConRad Thermal Blanket is recommended for all procedures and imaging, except for MRI.
- The MRI-Safe ConRad Thermal Blanket (Page 62) is used with MRI procedures.

MRI Safe Thermal Mattress

WABMRI-SET	Set of Small, Medium & Large Mattresses

Dormosafe Electric Blanket

The Dormosafe heating mat is the latest development of professional heating systems for veterinary medicine. The padded mat combines safety, user-friendliness and heating quality. Three temperature sensors distributed throughout the mat continuously measure the accumulated heat between the patient and the mat. The redundantly protected microcontroller in the mat regulates the heat output depending on the degree of cooling of the patient. The pre-set temperature of 42°C is thus neither exceeded nor fallen short of, which guarantees an even and safe heating.

- Safety Voltage—electrical safety for patient and personal.
- Overheat protection with 3 Temperature Sensors—optimise heat transfer to 42°C.
- Acoustice Alarm—due to errors or temperature above 45°C.
- Size 45cm x 35cm x 2cm

Code	Size
DHM45352	Dormosafe Heat Mat Complete 45cm x 35cm x 2cm
DHM60452	Dormosafe Heat Mat Complete 60cm x 45cm x 2cm

Warm Patients Heal Faster

A constant body core temperature is a basic prerequisite for the function of vital organs. It reduces the risk of surgical complications, accelerates the recovery phase and healing.

Easy, Fail-Safe Handling

The control electronics of the Dormosafe heating mat are accommodated in the mat itself so there is no longer any need for an external control unit. The flexible mat is therefore completely insensitive to falls. Due to the three sensors, a wrong positioning of the patient is impossible and therefore handling is easier.

Heated Veterinary Operating Tables

A simple but effective product that gently warms small mammals on the operating table minimising loss of body heat, and increasing survival rates.

The V500DVstat is constructed from tough ABS plastic with an anodised aluminium panel bonded to the surface to aid cleaning and sterilisation. A separate digital control module allows the precise temperature of the surface to be selected by the surgeon within the range 10 to 50 degrees C, and operation of the heater is indicated by an amber light.

Size: 350mm x 530mm

The V500 is constructed from tough ABS plastic, with an anodised aluminium panel bonded to the surface to aid cleaning and sterilisation. This is heated and controlled by an electronic thermostat to 35 degrees C. An amber light displays operation of the heater.

Schure Slide™ Patient Transfer System

Used to transfer patients safely and easily. The sliding action eliminates the need to lift the patient, removing the risk of possible back injury to personnel. There are no steel rollers or hard surfaces to cause pain or discomfort to the patient, and the unique patented design allows patient transfer in any position. The Schure Slide™ is radiolucent and is non-staining.

Measures: 46 x 84 cm

Buster ICU Cage

Buster ICU Cages are collapsible, portable and can be set up in the prep room or any appropriate sit.

They fit standard stainless steel kennels.

They allow for the provision of oxygen or heat and also allow for the cooling of animals.

They can also be used as an anaesthetic chamber provided a co-axial circuit is used.

Includes…

1 x Carry Bag

1 x ICU Cage

1 x Mat

Buster Gel Packs (1 x S, 2 x M, 4 x L)

Oxygen Accessories Pack

6 x Venturi Nebuliser, T Piece, Cap 2.1m oxygen tubing.

BUSTER Electric heat pad—Medium and Large BUSTER ICU Cages only.

Jugular Catheters—Vygon

Description

Multicath Expert is the expert silver ion impregnated catheter. It possesses benefits such as:

- Pressure-rated
- Long-lasting; effective up to 30 days
- Atraumatic tip meaning its soft, flexible design allows smooth transition over the guidewire whilst reducing the potential for internal vessel trauma
- Anti-kink Teflon coated guidewire

Multistar antibiotic technology; releases rifampicin and miconazole on both inner and outer surfaces at a slow, steady rate.

AC2280	Catheter set 22G, 80mm

Surgivet Clear View Foley Catheters

Closed-end silicone catheter with distal balloon cuff used for intermittent drainage of Urine from the bladder or contrast studies of urogenital tract.

- Ribbed balloon provides even inflation and aids in retaining the catheter inside the bladder.

- Recommended to only be used with PTFE coated wire guides

- Sterile

- Radiopaque

Available individually or in box quantities

KatKath™ Catheter

Code	Description
KAT3511	Standard KatKath 3.5FR x 11cm. BOX OF 10
KAT3514	Standard KatKath 3.5FR x 14cm BOX OF 10
KAT3518	Adjustable KatKath 3.5FR x 18cm. Box of 10

Standard

Simple to use—unblock the cat, leave in place
Non-reactive material—low friction. Vital when dealing with an inflamed oedematous urethra
End hole—allowing concurrent flushing during placement
Available with a rotating suture collar—allowing natural rotation when in situ
Kink and crush resistant without the use of a stylet
Tapered distal tip—allowing atraumatic catheter placement
Adjustable has an adjustable wing

Adjustable

'Little Herbert'

Allows for firm connection of drainage lines to urinary catheters without interfering with the comfort factor.

sales@acevetsupplies.co.uk

Luer-lock T connector with Bionector allows intermittent injection via latex-free membrane during simultaneous infusion. T connectors are ideal for general veterinary ward and theatre use as they can be pre-placed and heparinised by nursing staff on admission, even before a plan has been made regarding drug and infusion administration.

They are a universal IV solution, veterinary surgeons are able to administer drugs and rapidly connect infusion lines at will to any patient. Significant time savings are possible in veterinary wards and theatres if in-patients routinely have a Bionector T piece in place.

The Bionector needle-free device allows easy IV disconnection for exercise breaks, and can be disinfected with most antiseptic solutions (example: 70° alcohol). Avoid using antiseptic containing both alcohol and hydrogen peroxide.

Single Bionector

Code	Description
0896.03	Bionector Closed System Needle Free Device

Bionector T-Piece

Code	Description
1VTUSBN-448	10cm Luer-Lock T-Piece Extension Connector with Bionector
1VTUSBN-450	Bionector T-Piece with Two Needle-free Access Ports

Bionector and Spike Bag

Code	Description
0856.11	Bionector and Spike Bag

Code 856.01: spike with Bionector, for aspirating or adding fluids to bags or bottles of intravenous solutions. Can also be used for paediatric bags.
The needless connector Bionector maintains at all times a closed system allowing to aspirate or adding fluids in a aseptic manner.

PalmSat VET Pulse Oximeter

The 2500A VET handheld pulse oximeter is a universal tool with unmatched versatility and cost-effectiveness for all veterinary SpO$_2$ monitoring and research applications. Compact and easy to use, the 2500A VET is proven accurate for pulse rates up to 450 beats per minute (BPM) and is ideal for monitoring during surgeries and dental procedures. As the industry benchmark for durability and performance, Nonin veterinary pulse oximeters have gained the confidence of veterinary professionals worldwide.

Code	Description

Charger Kit & Battery Pack

Edan H100B Veterinary Pulse Oximeter

Standard System:

- Main Unit
- LCD Screen
- RTC display
- SpO2 and Pulse Rate Measurement
- Display Numeric and Waveform of SpO2 Simultaneously
- Convenient AA Size for up to 48 Hours Working
- Up to 100 IDs and 300 hours data storage capability for continuous monitoring
- The latest 10 minutes trend graph and table of SpO2 and Pulse Rate can be reviewed in the screen
- Compatible with Nellcor VETSAT Veterinary sensor
- Pitch tone
  Standard Accessories:

- EDAN Veterinary Pulse Oximetry
- Sensor
- AA Size Battery
- Carrying Case
- User Manual
- VE-H100B Quick Reference Card

Sp02 Sensor Clips

Code	Description
SP02CLIPS	Oxygen Sensor Clips Set of 2, Large & Small
MAOSCLIP-NC	Oxygen Sensor Clip for Nellcor
V1709	'C' Clip replacement for use with Surgivet V1707

SP02CLIPS   MAOSCLIP-NC   V1709

Sp02 Sensors—Surgivet

Compatible with Surgivet Monitors V3304, V3402, V3404, V6004, V9004, V9200, V9230, V8400D, V3395 and V1030.

SP02S-V1700 This reflectance sensor can be applied to the ventral tail base of a patient and secured with a cohesive bandage.

SP02S-V1703 The Universal 'Y' sensor is designed to be used on areas of thicker tissue. It is the standard clip used in most small animal practices.

SP02S-V1707 The 'C' sensor is perfect for cats, dogs and horses. The sensor should be placed on the thigh, metatarsal, or meta-carpal for smaller patients. The sensor should be placed over the Achilles tendon, tongue, prepuce, vulva, or through the toe webbing on large patients.

Mindray

SP02EC-MR

Interface Cable for Mindray and Passport Monitors. Equivalent to Mindray 010-20-42594. To be used with SP02EPSQ-MR

Vetronic MiniTemp

Code	Description
MINITEMP	Vetronic Minitemp Unit, includes choice of probe
MT400RP	Rectal Probe for 400 Series
MT400SP	Surface Probe for 400 Series
MT415RP	Rigid Probe for 415 Series
MT415FP	Flexible Probe for 415 Series

The MiniTemp is a small, hand-held battery operated temperature monitor designed specifically for use with animals. The monitor supports two common ranges of temperature sensor – the industry-standard YSI 400-compatible range and the 8415 miniature range. The miniature sensors measure just 1.2mm in diameter and are suitable for use with small mammals and exotic species. The standard temperature sensors measure 4mm in diameter and are suitable for all larger species. The introduction of the concept of a comfort zone for temperature monitoring is designed to enable the user to see at a glance if the animal is within the comfortable range of body temperatures. The comfort zone is designed for use with mammals and has a lower limit of 36.6°C (97.9°F) and an upper limit of 39.6°C (103.2°F). This relates to one degree above and two degrees below normal body temperature. When the temperature being monitored is within the comfort zone the LED at the top of the unit flashes green. For temperatures outside the comfort zone, the LED flashes red. The unit is housed in a robust rubber boot resistant to drops and knocks. The boot also has a built-in tilt stand for improved viewing angles.

Mechanical

- Weight 125g (225g with -fitted rubber boot)
- Dimensions 86mm x 145mm x 34mm
- Construction Rugged ABS plastic case housed in a rubber boot

Electrical

- Screen size 25mm x 18mm
- Screen type 128 x 64 pixels, transflective LCD
- Electrical supply Alkaline or rechargeable 9v PP3 battery only.
- Battery life 200 hours run time, six months standby

Temperature Sensors*

Temperature range 5°C to 45°C

Accuracy +/- 0.1°C within specified range. Accuracy outside of this range is unspecified
Standard 400 Series:
Rectal type 2m x 4mm, terminated in 6.35mm standard jack plug
Surface type 2m x 8mm disc, terminated in 6.35mm standard jack plug
Miniature Series (8514):
Rigid probe 1.2mm tip housed in a 2mm x 80mm rigid metal probe
Flexible probe 1.2mm tip housed in a 2mm x 270mm exible sheath, terminated with a 3.5mm jack plug.
*MiniTemp can be fitted with a module to support either the standard sensors, or the miniature sensors, but not both. Requirements must be specified when ordering.

Veterinary Thermometer

- 10 second measurement time
- Auto shut off after 10 minutes
- 32.0°C to 42.9°C measurement range
- Clear digital changeable display (°C / °F)
- Waterproof

Easy to use battery operated electronic thermometer with chart giving Hobday's specification (the normal body temperature for a variety of animals).

The temperature range of this thermometer is 32 to +42°C and it displays the temperature in 0.1°C increments. It has an accuracy of +/-0.1°C between 35 and 39°C, otherwise +/-0.2°C.

It uses a single LR41 or equivalent battery.

Code	Description
THERMVET	Veterinary Thermometer

Flexible Tip Thermometer

- Flexible tip
- Auto shut off
- 1.5v button battery
- Last memory reading
- Bleeper function
- Size: 134 x 22 x 14mm

Code	Description
THERMFLEX	Flexible Tip Thermometer
THERMPC100	Thermometer Probe Cover. Pack of 100

Infrared Tympanic Ear Thermometer

- Quick and Accurate measuring time <1 second.
- Long life: over 4000 readings with 2x AAA batteries.
- Automatic Power off.
- Display range: 34°C – 44°C.
- Stores last 10 readings.
- Low battery warning.

Code	Description
THERMEAR	Ear Thermometer with Case
THERMEPC20	Ear Thermometer Probe Covers. Pack/ 20.

Vetronic ICON Oxygen Analyser

Icon is a new in-circuit oxygen monitor designed for use in veterinary operating theatres and intensive care wards.

The Icon unit can be placed on the Fresh Gas Outlet of an anaesthetic machine or within the rebreathing limbs of a circle system, wherever the oxygen concentration needs to be known.

The Icon unit uses a single AA battery that has a lifetime of approximately 1 year when used for 8 hours a day every day. The sensing element is a longlife galvanic sensor that has a working life of approximately 2 years.

Code	Description
ICON	ICON Oxygen Analyser

Datex-Ohmeda Oxygen Cell

Code	Description
M-10	M-10 Oxygen Cell 6050-0004-110

Other types available on request. Email sales@acevetsupplies.co.uk or call 01491 527027.

SC0610	6fr	SC1410	14fr
SC0810	8fr	SC1610	16fr
SC1010	10fr	SC1810	18fr
SC1210	12fr		

- Manufactured from transparent medical grade PVC allowing
- clinicians to visualise any blockages quickly.
- Atraumatic tip with double offset eye to provide relief if the distal hole becomes occluded.
- Smooth surface for easy insertion.
- Different connector ends available for compatibility with a range of suction units and aspirators.
- Colour coded according to size to make visual identification easy.
- Supplied sterile in individual easy access sachets.

Suction Tubing

Code	Size
ST6518	6.5mm ID x 1.8M Length
ST6530	6.5mm ID x 3.0M Length

- Transparent tubing allows blockages to be visualised quickly.
- Thick walls prevent the tube from collapsing under high negative pressure.
- Flexible universal connectors provide a secure connection to the handle and source.
- A range of lengths available.
- Supplied sterile in individual easy access sachets.

Suction Yankauer Handle

Available individually or in boxes of 20

Code	Description	Box Qty	Box Code
SYVC431001	Suction Yankauer Handle Vented Crown Tip	20	**SYVC431001/20**
SYVP431004	Suction Yankauer Handle Vented Plain Tip	20	**SYVP431004/20**

- Transparent suction handles for clear visualisation during suction. Similar in shape to traditional metal Yankauer suckers.
- Available with plain or crown tip, with or without vents to control suction.
- Also available packed with suction tubing and handles for maximum convenience.
- Supplied sterile in individual easy access sachets.

Manual Suction Pump

Code	Size
SPMCOM	Suction Pump Complete
SPMRDJ	Replacement Jar with Adult & Infant Catheters

- Hand powered, can be used anywhere
- Portable, compact and lightweight
- Easy to use with one hand
- Auto stop when full

Suction Controller

The suction controller enables the vacuum to be set at any level from 0 to full pipeline

vacuum. The vacuum gauge is marked from 0 to -100 kPa and 0 to -750 mmHg.

Code	Size
SC0100	Suction Controller with Direct BS Probe

Eschmann Suction Filter

Code	Size
SF-VP25	Suction Filter for Eschmann VP25, VP35, VP45. Box of 10.

Waste Gas Canisters

Code	Description
WAG001	Waste Gas Canister Single
WAG006	Waste Gas Canister Box of 6

- Contains activated carbon
- Absorbs 200g of organic waste anaesthetic agent
- Not suitable for use with N_2O
- Approximate maximum constant use—20 hours
- Discard when weight reaches 1400g
- Dispose by controlled incineration

Connectors & Tubing

APL Valve

Code	Description
INT1972000	Anaesthesia gas scavenging pressure relief valve 30F/30F with 4.2M 30mm Flextube
INT1972001	Anaesthesia gas scavenging pressure relief valve 30F/22M with 22mm Flextube, ≥ 4.8m

This in-line pressure relief valve is connected to the outlet port of the breathing system APL valve. The purpose of the valve is to allow a pressure release in the case of the AGSS transfer tube becoming occluded

01491 527027

acevetsupplies.co.uk   **sales@acevetsupplies.co.uk**

MEC Receiving System

Conforms to ISO 8835-3

• MRI compatible

• Wall, rail or machine mounted

• Weighs 1 Kg, size 80mm X 390mm

• Supplied with Disposal and Transfer hoses

• Both Disposal Hose and Patient Inlet port swivel about 360° to ensure hose positioning and prevent occlusion

• 3m, 4m or 5m Disposal Hose

• 2.4m Transfer Hose

• Complete with Pressure Relief Valve.

Code	Size
12800000	Receiving System inc. 5m Disposable Hose and 2.4m Transfer c/w Pressure Relief Valve
12800013	Replacement Hose Assembly

Purair 80 AGSS

Code	Size
PURAIR80	Purair 80 Gas Receiving System

Designed as a stand alone scavenging unit for use with anaesthetic work stations that have an integrated patient air break

• Cost effective method of anaesthetic gas scavenging without the need for remote pipework

• Simple to install and factory set flow rates, so no commissioning is required

• Extraction capacity is 80 litres per minute to current European flow rates

• Conform to ISO 8835-3 and is used for the extraction of waste and excess gases

• Occlusion and fault alarm.

SL-W-MEME	MEDETOMIDINE/METHADONE, White	SL-W-RABA	RABACFOSADINE, White
SL-W-MEMK	MEDETOMIDINE/METHADONE/KETAMINE, White	SL-W-RANI	RANITIDINE, White
SL-O-MELO	MELOXICAM, Orange	SL-B-REMI	REMIFENTANIL, Blue
SL-V-MELO	MELOXICAM, Violet	SL-V-RIMA	RIMADYL, Violet
SL-W-MELO	MELOXICAM, White	SL-R-ROCU	ROCURONIUM, Red
SL-G-MEPI	MEPIVACAINE, Grey	SL-V-ROCU	ROCURONIUM, Violet
SL-V-MCAT	METACAM CAT, Violet	SL-S-ROMI	ROMIFIDINE, Salmon
SL-V-META	METACAM, Violet	SL-G-ROPI	ROPIVACAINE, Grey
SL-W-META	METACAM, White	SL-W-SALB	SALBUTAMOL, White
SL-V-METR	METARAMINOL, Violet	SL-W-SA09	SALINE 0.9%, White
SL-B-METH	METHADONE, Blue	SL-W-SALF	SALINE FLUSH, White
SL-S-METO	METOCLOPRAMIDE, Salmon	SL-W-SALI	SALINE, White
SL-W-METR	METRONIDAZOLE, White	SL-W-SS09	SALINE/SODIUM CHLORIDE, White
SL-O-MIDA	MIDAZOLAM, Orange	SL-W-SEDA	SEDATION, White
SL-S-MIDA	MIDAZOLAM, Salmon	SL-B-SEDC	SEDATOR/COMFORTAN, Blue
SL-W-MITO	MITOXANTRONE, White	SL-O-SHAK	SHAKE BEFORE USE, Orange
SL-R-MIVA	MIVACURIUM, Red	SL-G-SHOR	SHORT DATE, Green
SL-O-MORP	MORPHINE N P, Orange	SL-W-SODI	SODIUM BICARBONATE, White
SL-B-MORP	MORPHINE, Blue	SL-W-SO45	SODIUM CHLORIDE 0.45%, White
SL-R-MUSC	MUSCLE RELAXANT, Red	SL-W-SO09	SODIUM CHLORIDE 0.9%, White
SL-O-NSAI	N.S.A.I.D. Orange	SL-VS-SODI	SODIUM NITROPRUSSIDE, Violet Stripe
SL-WR-NSAI	N.S.A.I.D. White (Red Writing)	SL-W-SOLU	SOLUMEDRONE, White
SL-W-NSAI	N.S.A.I.D. White	SL-W-SYNO	SYNULOX, White
SL-W-NACL	NaCl 0.9%, White	SL-W-TRAN	TRANEXAMIC ACID, White
SL-BS-NALO	NALOXONE, Blue Strip	SL-W-VENO	VENOUS, White
SL-RS-NEOS	NEOSTIGMINE, Red Stripe	SL-B-VETE	VETERGESIC, Blue
SL-O-NERV	NERVE BLOCK, Orange	SL-W-VETE	VETERGESIC, White
SL-V-NORA	NORADRENALINE, Violet	SL-R-VINB	VINBLASTINE, Red
SL-V-NORE	NOREPINEPHRINE, Violet	SL-W-VINB	VINBLASTINE, White
SL-R-OFFL	OFF LICENCE, Red	SL-R-VINC	VINCRISTINE, Red
SL-V-OMEP	OMEPRAZOLE, Violet	SL-W-VINC	VINCRISTINE, White
SL-W-OMEP	OMEPRAZOLE, White	SL-W-VINO	VINORELBINE, White
SL-S-ONDA	ONDANSETRON, Salmon	SL-W-WFIN	WATER FOR INJECTION, White
SL-R-OPEN	OPENED (DATE....), Red	SL-S-XYLA	XYLAZINE, Salmon
SL-O-PARA	PARACETAMOL, Orange	SL-W-ZINA	ZINACEF, White
SL-W-PARA	PARACETAMOL, White	SL-Y-ZINA	ZINACEF, Yellow
SL-RS-PENT	PENTOBARBITONE SODIUM, Red Stripe	SL-W-ACPM	CP/MEDETOMIDINE, White
SL-B-PETH	PETHIDINE, Blue	SL-W-ENRO	ENROFLOXACIN. White
SL-G-PHEN	PHENOBARBITONE, Green	SL-W-MARB	MARBOFLOXACIN. White
SL-V-PHEN	PHENYLEPHRINE, Violet	SL-O-ROBE	ROBENACOXIB. Orange
SL-W-POTA	POTTASSIUM CHLORIDE, White	SL-R-5FU	5FU, Red
